56. My favourite sports person

There are many great sports persons in the world. I like many athletes like : M. S. Dhoni, Virat Kohli, Ronaldo, Messi, Ussain Bolt and Saniya Mirza. But my favourite sports player is none other than ' God of cricket ' Sachin Tendulkar.

Sachin started playing cricket for India at the young age of sixteen. Since then, he has never looked back. He has scored lots of runs and created many world records. He has scored highest centuries in international cricket. He has scored 49 centuries in one day cricket and 51 centuries in test cricket. He was the first person to score a double century in a one day match. He was also a good bowler and fielder. He has received many awards such as : Arjuna Award, Rajiv Gandhi Khel Ratna Award, Padma Shree Award and Padma Vibhushan Award. I am very proud of him. Sachin has a loving Gujarati wife Anjali. He has a girl named Sarah and a boy named Arjun. He retired from cricket in 2013 but he will never retire from our hearts and memories. Hats off to the master blaster !

OR Science - advantages and disadvantages

Science has greatly influenced our lives, bringing both benefits and challenges. Let's explore some of the key points.

Advantages of Scientific Progress :

Scientific advancements have made our daily lives easier and more comfortable. From household appliances like washing machines and microwaves to transportation systems like cars and airplanes, science has provided us with tools that save time and effort. One of the most important benefits of science is in the field of medicine. Vaccines, antibiotics, and advanced surgical techniques have saved countless lives. Medical research continues to find cures for diseases and improve our overall health.

Disadvantages of Scientific Progress :

While technology can be beneficial, it can also be misused. For example, the internet is a great source of information, but it can also spread misinformation. Similarly, advancements in weaponry have led to more destructive wars. Industrialization and technological advancements have led to increased pollution. Factories release harmful chemicals into the air and water, affecting both the environment and human health. The use of plastic, a product of scientific progress, has also led to significant environmental issues.

In conclusion, while science has brought many advantages that make our lives better, it also comes with disadvantages that we need to manage carefully. Balancing the benefits and drawbacks of scientific progress is essential for a sustainable future.

OR "Earth provides enough to satisfy everyone's need, but not everyone's greed." – Mahatma Gandhi

Our earth is the only planet of the solar system that has an eco system and can sustain life. It provides us shelter, food, water and other requirements. But instead of thanking our mother earth we have polluted its land, water and air. We have misused its resources. Every day, we see on TV and read in newspapers that we all should do this and that for our eco system. But, do we really do anything ? No, we just sit and watch the show and worry. We wait for Government or some NGOs to take action. Is it not our responsibility to do something about it ? We as people can play an important role in saving our eco system :

1. Trees keeps a balance in the eco system of the earth. So, we should plant more trees.
2. We should not waste or pollute water.
3. We should keep water bodies clean.
4. We should keep our surrounding neat and clean.
5. We should dispose garbage / waste properly.
6. We should stop using plastic products.
7. We should use petroleum products wisely and judiciously.
8. We should use eco friendly vehicles to reduce air pollution.
9. We should not hunt and kill animals and birds for our selfish needs.
10. We should not spread noise pollution.

Thus, by taking a few small steps, we can play an important role in saving our eco system.

Subject : Invitation to stay at my home on Diwali / Let's celebrate Diwali together

Dear Nirali,

As you know, we will have Diwali vacation from next week. So, I am inviting you to stay at my house for one or two weeks. Let's celebrate Diwali together this year. We will make plans to enjoy our vacation. We will go to see new movies. We will go for picnic with our friends and family. We will go for outdoor camping. We will play different games. We will also work on school's Diwali project together. In short, we will have a lot of fun together. It will be a memorable experience for both of us. Please do come. Waiting for you eagerly.

Your best friend,

Ketki Chauhan

Viharika Parmar

School Report Team - 10 (B)

Yesterday on 28th February, our school held a Science Exhibition. All the students and teachers took part with joy and great enthusiasm. Mr. P. B. Gadhvi, D.E.O. of Ahmedabad was invited as the chief guest. *The Science exhibition was held in our school compound. All the parents were invited to visit the exhibition. There were different sections like : Space section, Environment section, Computer section, Movie section and Experiment section. Many beautiful models, charts, and books were put into display. Many experiments were conducted for the visitors in the experiment section. Visitors were surprised to see some of the experiments. At the end of the day, we were taken to the assembly hall. There, prizes were given to the best models and experiments.* Then our chief guest, Mr. P. B. Gadhvi, D.E.O. gave his speech on the importance of science in our lives. Then our principal, Mr. Vijay Raval gave his speech. He thanked all the teachers, students and participants to make the event / exhibition a great success. He also thanked Mr. P. B. Gadhvi for coming to our school. At the end of the event, sweets were distributed among the students. The students happily returned to their homes.

What a memorable day it was !
