20	21	22	Q. What is meant'Simple Form'?				
			Ans. Form: Access provides a user friendly interface, which allows users to enter information in a graphical way. It is known as 'Form'. This information transparently passes to the underlying database.	=			
			Split Form: This presentation shows underlying database in one half of the section and form in other half for entering information in the record selected in the datasheet.				
			The two views in the form are synchronized so that scrolling in one view causes scrolling of the other view to same location of the record.				
21	22	20	Q. Name and explainscattered locations.
