सामान्य निर्देशः

निम्नलिखित निर्देशों को बहुत सावधानी से पढ़िए और उनका सख़्ती से पालन कीजिए :

- (i) इस प्रश्न-पत्र में 38 प्रश्न हैं । सभी प्रश्न अनिवार्य हैं ।
- (ii) यह प्रश्न-पत्र पाँच खण्डों में विभाजित है क, ख, ग, घ एवं ङ ।
- (iii) खण्ड क में प्रश्न संख्या 1 से 18 तक बहुविकल्पीय (MCQ) तथा प्रश्न संख्या 19 एवं 20 अभिकथन एवं तर्क आधारित एक-एक अंक के प्रश्न हैं।
- (iv) खण्ड ख में प्रश्न संख्या 21 से 25 तक अति लघु-उत्तरीय (VSA) प्रकार के दो-दो अंकों के प्रश्न हैं ।
- (v) खण्ड ग में प्रश्न संख्या 26 से 31 तक लघु-उत्तरीय (SA) प्रकार के तीन-तीन अंकों के प्रश्न हैं।
- (vi) खण्ड घ में प्रश्न संख्या 32 से 35 तक दीर्घ-उत्तरीय (LA) प्रकार के पाँच-पाँच अंकों के प्रश्न हैं ।
- (vii) खण्ड ङ में प्रश्न संख्या 36 से 38 तक प्रकरण अध्ययन आधारित चार-चार अंकों के प्रश्न हैं। प्रत्येक प्रकरण अध्ययन में आंतरिक विकल्प दो-दो अंकों के प्रश्न में दिया गया है।
- (viii) प्रश्न-पत्र में समग्र विकल्प नहीं दिया गया है। यद्यपि, खण्ड ख के 2 प्रश्नों में, खण्ड ग के 2 प्रश्नों में, खण्ड घ के 2 प्रश्नों में तथा खण्ड ङ के 3 प्रश्नों में आंतरिक विकल्प का प्रावधान दिया गया है।
- (ix) जहाँ आवश्यक हो स्वच्छ आकृतियाँ बनाइए । जहाँ आवश्यक हो π = $\frac{22}{7}$ लीजिए, यदि अन्यथा न दिया गया हो ।
- (x) कैल्कुलेटर का उपयोग वर्जित है ।

खण्ड क

इस खण्ड में बहुविकल्पीय प्रश्न (MCQ) हैं, जिनमें प्रत्येक प्रश्न 1 अंक का है ।

General Instructions :

Read the following instructions carefully and follow them :

- (i) This question paper contains **38** questions. **All** questions are **compulsory**.
- (ii) This question paper is divided into five Sections A, B, C, D and E.
- (iii) In Section A, Questions no. 1 to 18 are multiple choice questions (MCQs) and questions number 19 and 20 are Assertion-Reason based questions of 1 mark each.
- (iv) In Section B, Questions no. 21 to 25 are very short answer (VSA) type questions, carrying 2 marks each.
- (v) In Section C, Questions no. 26 to 31 are short answer (SA) type questions, carrying 3 marks each.
- (vi) In Section D, Questions no. 32 to 35 are long answer (LA) type questions carrying 5 marks each.
- (vii) In Section E, Questions no. 36 to 38 are case study based questions carrying 4 marks each. Internal choice is provided in 2 marks questions in each case-study.
- (viii) There is no overall choice. However, an internal choice has been provided in 2 questions in Section B, 2 questions in Section C, 2 questions in Section D and 3 questions in Section E.
- (ix) Draw neat diagrams wherever required. Take $\pi = \frac{22}{7}$ wherever required, if not stated.
- (x) Use of calculators is **not** allowed.

SECTION A

This section comprises multiple choice questions (MCQs) of 1 mark each.

(b)	$\cos 60^{\circ}$
(d)	$\cos 30^{\circ}$

2. In \triangle ABC and \triangle DEF, $\frac{AB}{DE} = \frac{BC}{FD}$. Which of the following makes the two triangles similar ?

Page 3

A.P.: 20, 13, 6, -1,, -148 में अंतिम पद से 13वाँ पद है:
 (a) 57
 (b) -57

(c)
$$64$$
 (d) -64

4. दो पासे एक साथ फेंके गए । योगफल 10 से अधिक प्राप्त होने की प्रायिकता क्या है ?

(a)
$$\frac{1}{9}$$
 (b) $\frac{1}{6}$
(c) $\frac{1}{12}$ (d) $\frac{5}{18}$

5. दी गई आकृति में, AB = BC = 10 cm | यदि AC = 7 cm है, तो BP की लम्बाई होगी :

 (a) 3.5 cm (b) 7 cm

 (c) 6.5 cm (d) 5 cm

6. 3 m गहरी और 40 m चौड़ी नदी में पानी 2 km/h की दर से बह रहा है । 2 मिनट में समुद्र में कितना पानी गिर जाएगा ?

(a)	800 m^3	(b)	4000 m^3
(c)	8000 m^3	(d)	2000 m^3

7. यदि किन्हीं आँकड़ों के लिए, माध्य और माध्यक क्रमश: 12 और 15 हैं, तो बहुलक होगा :

Page 4

(a)	13.5	(b)	21
(c)	6	(d)	14

3. The 13th term from the end of the A.P. : 20, 13, 6, -1,, -148 is : (a) 57 (b) -57(c) 64 (d) -64

4. Two dice are rolled together. What is the probability of getting a sum greater than 10?

(a)	$\frac{1}{9}$	(b)	$\frac{1}{6}$
(c)	$\frac{1}{12}$	(d)	$\frac{5}{18}$

5. In the given figure, AB = BC = 10 cm. If AC = 7 cm, then the length of BP is :

- 6. Water in a river which is 3 m deep and 40 m wide is flowing at the rate of 2 km/h. How much water will fall into the sea in 2 minutes ?
 - (a) 800 m^3 (b) 4000 m^3
 - $(c) \qquad 8000 \ m^3 \qquad \qquad (d) \qquad 2000 \ m^3$
- 7. If the mean and the median of a data are 12 and 15 respectively, then its mode is :

(a)	13.5	(b)	21	
(c)	6	(d)	14	
30/5/2	~~~~	Page 5		Р.Т.О.

8. दी गई आकृति में, केन्द्र O के एक वृत्त पर AB एक स्पर्श-रेखा है । यदि OA = 6 cm और ∠ OAB = 30° है, तो वृत्त की त्रिज्या होगी :

- (a) 3 cm (b) $3\sqrt{3} \text{ cm}$

 (c) 2 cm (d) $\sqrt{3} \text{ cm}$
- 9. दी गई आकृति में, केन्द्र O वाले एक वृत्त पर AC और AB स्पर्श-रेखाएँ हैं । यदि \angle COD = 120° है, तो \angle BAO बराबर है :

(a) 30° (b) 60° (c) 45° (d) 90°

10. निम्नलिखित में से कौन-सी संख्या, किसी घटना के घटने की प्रायिकता नहीं हो सकती है ?

- (a) 0 (b) $\frac{7}{0.01}$ (c) 0.07 (d) $\frac{0.07}{3}$
- 11. यदि किसी सांख्यिकी आँकड़ों, जिसमें n पद हैं, के प्रत्येक पद को 2 से कम कर दिया जाए, तो आँकड़ों का माध्य :
 - (a) 2 कम हो जाएगा
 - (b) अपरिवर्तित रहेगा
 - (c) 2n कम हो जाएगा
 - (d) 1 कम हो जाएगा

30/5/2

Page 6

8. In the given figure, AB is a tangent to the circle centered at O. If $OA = 6 \text{ cm} \text{ and } \angle OAB = 30^{\circ}$, then the radius of the circle is :

9. In the given figure, AC and AB are tangents to a circle centered at O. If $\angle \text{COD} = 120^{\circ}$, then $\angle \text{BAO}$ is equal to :

10. Which of the following numbers *cannot* be the probability of happening of an event ?

(a)	0	(b)	$\frac{7}{0.01}$
(c)	0.07	(d)	$\frac{0.07}{3}$

- 11. If every term of the statistical data consisting of n terms is decreased by 2, then the mean of the data :
 - (a) decreases by 2
 - (b) remains unchanged
 - $(c) \qquad decreases \ by \ 2n$
 - $(d) \qquad decreases \ by \ 1$

P.T.O.

18. एक A.P. जिसका nवाँ पद $a_n = 5n - 7$ द्वारा दिया गया है, का सार्व अंतर होगा :

- (a) -7 (b) 7
- (c) 5 (d) -2

प्रश्न संख्या 19 और 20 अभिकथन एवं तर्क आधारित प्रश्न हैं और प्रत्येक प्रश्न का 1 अंक है। दो कथन दिए गए हैं जिनमें एक को अभिकथन (A) तथा दूसरे को तर्क (R) द्वारा अंकित किया गया है। इन प्रश्नों के सही उत्तर नीचे दिए गए कोडों (a), (b), (c) और (d) में से चुनकर दीजिए।

- (a) अभिकथन (A) और तर्क (R) दोनों सही हैं और तर्क (R), अभिकथन (A) की सही व्याख्या करता है।
- (b) अभिकथन (A) और तर्क (R) दोनों सही हैं, परन्तु तर्क (R), अभिकथन (A) की सही व्याख्या *नहीं* करता है ।
- (c) अभिकथन (A) सही है, परन्तु तर्क (R) ग़लत है।
- (d) अभिकथन (A) ग़लत है, परन्तु तर्क (R) सही है।
- 19. अभिकथन (A) : संख्या 5ⁿ कभी भी अंक शून्य (0) पर समाप्त नहीं होती है, जहाँ n कोई भी प्राकृत संख्या है ।

तर्क (R) : 5 के अभाज्य गुणनखंडन में केवल दो ही गुणनखंड हैं, 1 और 5 ।

- **20.** अभिकथन (A) : यदि केन्द्र O(2, 3) वाले एक वृत्त पर बिंदु A(4, 3) और B(x, 5) स्थित हैं, तो x का मान 2 होगा ।
 - तर्क (R) : वृत्त की प्रत्येक जीवा का मध्य-बिंदु, वृत्त का केन्द्र होता है।

खण्ड ख

इस खण्ड में अति लघु-उत्तरीय (VSA) प्रकार के प्रश्न हैं, जिनमें प्रत्येक के 2 अंक हैं।

- 21. अभाज्य गुणनखंडन से 96 और 120 का HCF और LCM ज्ञात कीजिए।
- 22. बिन्दुओं (6, –3) तथा (1, 6) को जोड़ने वाले रेखाखंड को रेखा y = x जिस अनुपात में विभाजित करती है, वह अनुपात ज्ञात कीजिए।
- **23.** (क) यदि $a \cos \theta + b \sin \theta = m$ तथा $a \sin \theta b \cos \theta = n$ है, तो सिद्ध कीजिए कि $a^2 + b^2 = m^2 + n^2$.

अथवा

30/5/2

Page 10

Get More Learning Materials Here : 💶

- **18.** The common difference of the A.P. whose n^{th} term is given by $a_n = 5n 7$ is :
 - (a) -7 (b) 7
 - (c) 5 (d) -2

Questions number 19 and 20 are Assertion and Reason based questions carrying 1 mark each. Two statements are given, one labelled as Assertion (A) and the other is labelled as Reason (R). Select the correct answer to these questions from the codes (a), (b), (c) and (d) as given below.

- (a) Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of the Assertion (A).
- (b) Both Assertion (A) and Reason (R) are true, but Reason (R) is *not* the correct explanation of the Assertion (A).
- (c) Assertion (A) is true, but Reason (R) is false.
- (d) Assertion (A) is false, but Reason (R) is true.
- **19.** Assertion (A): The number 5^n cannot end with the digit 0, where n is a natural number.
 - Reason (R): Prime factorisation of 5 has only two factors, 1 and 5.
- **20.** Assertion (A): If the points A(4, 3) and B(x, 5) lie on a circle with centre O(2, 3), then the value of x is 2.
 - Reason(R): Centre of a circle is the mid-point of each chord of the circle.

SECTION B

This section comprises very short answer (VSA) type questions of 2 marks each.

- **21.** Using prime factorisation, find HCF and LCM of 96 and 120.
- 22. Find the ratio in which line y = x divides the line segment joining the points (6, -3) and (1, 6).
- 23. (a) If $a \cos \theta + b \sin \theta = m$ and $a \sin \theta b \cos \theta = n$, then prove that $a^2 + b^2 = m^2 + n^2$.

खण्ड घ

इस खण्ड में दीर्घ-उत्तरीय (LA) प्रकार के प्रश्न हैं, जिनमें प्रत्येक के 5 अंक हैं ।

4 cm त्रिज्या वाले एक वृत्त के परिगत एक त्रिभुज ABC इस प्रकार खींचा गया है कि (क) 32. रेखाखंड BD और DC की लंबाइयाँ क्रमश: 10 cm और 8 cm हैं । भुजाएँ AB और AC की लंबाइयाँ ज्ञात कीजिए, यदि दिया गया है कि △ ABC का क्षेत्रफल 90 cm² है ।

अथवा

दो वृत्त हैं जिनके केंद्र O और O' हैं, और त्रिज्याएँ क्रमश: 6 cm और 8 cm हैं । दो (ख) बिन्दुओं P और Q पर वे इस प्रकार प्रतिच्छेद करते हैं कि OP और O'P दो वृत्तों की स्पर्श-रेखाएँ हैं । उभयनिष्ठ जीवा PQ की लम्बाई ज्ञात कीजिए ।

SECTION D

This section comprises long answer (LA) type questions of 5 marks each.

32. (a) A triangle ABC is drawn to circumscribe a circle of radius 4 cm such that the segments BD and DC are of lengths 10 cm and 8 cm respectively. Find the lengths of the sides AB and AC, if it is given that area \triangle ABC = 90 cm².

(b) Two circles with centres O and O' of radii 6 cm and 8 cm, respectively intersect at two points P and Q such that OP and O'P are tangents to the two circles. Find the length of the common chord PQ.

- 33. 15 m भुजा वाले एक वर्गाकार घास के मैदान के एक कोने पर लगे खूँटे से एक घोड़े को 5 m लंबी रस्सी से बाँध दिया गया है । इस मैदान के उस भाग का क्षेत्रफल, जहाँ घोड़ा घास चर सकता है, ज्ञात कीजिए । यदि रस्सी की लंबाई बढ़ाकर 10 m कर दी जाए तो घास चर सकने वाले क्षेत्रफल में बढ़ोतरी भी ज्ञात कीजिए । (π = 3·14 का प्रयोग कीजिए)
- 34. भूमि के एक बिंदु P से एक खड़ी मीनार के शिखर का उन्नयन कोण 60° है । बिन्दु Q, जो लंबवत रूप से पहले बिन्दु P के 10 m ऊपर है, से शिखर का उन्नयन कोण 30° है । ज्ञात कीजिए :
 - (a) मीनार की ऊँचाई ।
 - (b) मीनार के पाद से बिन्दु P की दूरी ।
 - (c) मीनार के शिखर से बिन्दु P की दूरी ।
- 35. (क) एक रेलगाड़ी एक औसतन गति से 54 km की दूरी तय करती है और बाद में 63 km की दूरी पहली गति से 6 km/h अधिक औसतन गति से तय करती है । यदि रेलगाड़ी पूरी यात्रा 3 घंटों में तय करती है, तो इसकी पहली औसतन गति क्या थी ?

अथवा

(ख) दो पाइप मिलकर एक टैंक को ¹⁵/₈ घंटों में भर सकते हैं । अधिक व्यास वाला पाइप, छोटे व्यास वाले पाइप से, 2 घंटे कम में टैंक को भर सकता है । दोनों पाइप अलग-अलग टैंक को कितने समय में भर सकते हैं, ज्ञात कीजिए ।

30/5/2

#### खण्ड ङ

इस खण्ड में 3 प्रकरण अध्ययन आधारित प्रश्न हैं जिनमें प्रत्येक के 4 अंक हैं।

#### प्रकरण अध्ययन – 1

**36.** एक मिडिल स्कूल ने क्रिसमस कार्निवल पर निम्नलिखित स्पिनर गेम को फ़ंड-रेज़र के रूप में चलाने का निर्णय लिया।

*बैंगनी रंग बनाना* : प्रत्येक स्पिनर को एक बार स्पिन कीजिए । नीला और लाल, बैंगनी बनाते हैं । इसलिए, यदि एक स्पिनर लाल (R) और दूसरा नीला (B) दिखाता है, तो आप 'जीतते' हो । ऐसे परिणाम पर 'RB' लिखा जाता है ।

उपर्युक्त के आधार पर, निम्न प्रश्नों के उत्तर दीजिए :

- (i) गेम के सभी संभव परिणामों की सूची बनाइए ।
- (ii) 'बैंगनी रंग बनाने' की प्रायिकता ज्ञात कीजिए ।
- (iii) (क) प्रत्येक जीत के लिए, प्रतिभागी को ₹ 10 मिलते हैं, लेकिन अगर वह हार जाता है, तो उसे स्कूल को ₹ 5 का भुगतान करना होगा ।
   यदि 99 प्रतिभागियों ने गेम खेला हो, तो स्कूल ने कितना फंड एकत्र किया होगा ?

#### अथवा

(iii) (ख) यदि खेल में जीत या हार के लिए ₹ 5 की समान राशि तय की गई है, तो
 स्कूल ने कितना फंड एकत्र किया होगा ? (प्रतिभागियों की संख्या = 99)

#### SECTION E

This section comprises 3 case study based questions of 4 marks each.

## Case Study - 1

**36.** A middle school decided to run the following spinner game as a fund-raiser on Christmas Carnival.

*Making Purple* : Spin each spinner once. Blue and red make purple. So, if one spinner shows Red (R) and another Blue (B), then you 'win'. One such outcome is written as 'RB'.

Based on the above, answer the following questions :

(i) 1 List all possible outcomes of the game. Find the probability of 'Making Purple'. 1 (ii) (iii) (a) For each win, a participant gets  $\gtrless$  10, but if he/she loses, he/she has to pay  $\gtrless$  5 to the school. If 99 participants played, calculate how much fund could the school have collected. 2OR (iii) (b) If the same amount of ₹ 5 has been decided for winning or losing the game, then how much fund had been collected by school? (Number of participants = 99) 2

#### प्रकरण अध्ययन – 2

37. एक गोल्फ की गेंद लगभग 300 – 500 डिम्पल के साथ गोलाकार होती है, जो खेलने के दौरान उसके वेग को बढ़ाने में मदद करते हैं । गोल्फ की गेंद पारंपरिक रूप से सफेद होती है, लेकिन रंगों में भी उपलब्ध होती है । दी गई आकृति में, एक गोल्फ की गेंद का व्यास 4.2 cm और इसकी सतह पर त्रिज्या 2 mm के 315 डिम्पल (अर्ध-गोलाकार) हैं ।

उपर्युक्त के आधार पर, निम्न प्रश्नों के उत्तर दीजिए :

- (i) एक ऐसे डिम्पल का पृष्ठीय क्षेत्रफल ज्ञात कीजिए । 1
- (ii) एक डिम्पल बनाने के लिए खोदी गई सामग्री का आयतन ज्ञात कीजिए।

## Case Study – 2

37. A golf ball is spherical with about 300 – 500 dimples that help increase its velocity while in play. Golf balls are traditionally white but available in colours also. In the given figure, a golf ball has diameter 4.2 cm and the surface has 315 dimples (hemi-spherical) of radius 2 mm.

Based on the above, answer the following questions :

| (i)  | Find the surface area of one such dimple.                   | 1 |
|------|-------------------------------------------------------------|---|
| (ii) | Find the volume of the material dug out to make one dimple. | 1 |

(iii) (a) Find the total surface area exposed to the surroundings.

#### OR

(iii) (b) Find the volume of the golf ball. 2

#### प्रकरण अध्ययन – 3

**38.** एक्वेरियम के एक पूल में, एक डॉल्फिन 20 सेमी प्रति सेकण्ड की गति से यात्रा करते हुए, पानी से बाहर कूदती है । t सेकण्ड के बाद जल स्तर से उसकी ऊँचाई  $h = 20t - 16t^2$  द्वारा दी जाती है ।

उपर्युक्त के आधार पर, निम्न प्रश्नों के उत्तर दीजिए :

## Case Study – 3

**38.** In a pool at an aquarium, a dolphin jumps out of the water travelling at 20 cm per second. Its height above water level after t seconds is given by  $h = 20t - 16t^2$ .

Based on the above, answer the following questions :

- (i) Find zeroes of polynomial  $p(t) = 20t 16t^2$ .
- (ii) Which of the following types of graph represents p(t)?

| (iii) | (क) | ${f t}={3\over 2}$ पर ${f h}$ का मान क्या होगा ? परिणाम की व्याख्या कीजिए । | 2 |
|-------|-----|-----------------------------------------------------------------------------|---|
|-------|-----|-----------------------------------------------------------------------------|---|

#### अथवा

(iii) (ख) दोबारा जल स्तर से टकराने से पहले डॉल्फिन ने कितनी दूरी तय की है ? 2

30/5/2

(iii) (a) What would be the value of h at t =  $\frac{3}{2}$ ? Interpret the result. 2

## OR

(iii) (b) How much distance has the dolphin covered before hitting the water level again ?

| 3    | Evaluation is to be done as per instructions provided in the Marking Scheme. It should not                                                                                                                                                                                                                                                                                                                                     |
|      | be done according to one's own interpretation or any other consideration. Marking Scheme                                                                                                                                                                                                                                                                                                                                       |
|      | should be strictly adhered to and religiously followed. However, while evaluating, answers                                                                                                                                                                                                                                                                                                                                     |
|      | which are based on latest information or knowledge and/or are innovative, they may be                                                                                                                                                                                                                                                                                                                                          |
|      | assessed for their correctness otherwise and due marks be awarded to them.                                                                                                                                                                                                                                                                                                                                                     |
| 4    | The Marking scheme carries only suggested value points for the answers.                                                                                                                                                                                                                                                                                                                                                        |
|      | These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should                                                                                                                                                                                                                                        |
|      | be awarded accordingly.                                                                                                                                                                                                                                                                                                                                                                                                        |
| 5    | The Head-Examiner must go through the first five answer books evaluated by each evaluator                                                                                                                                                                                                                                                                                                                                      |
|      | on the first day, to ensure that evaluation has been carried out as per the instructions given                                                                                                                                                                                                                                                                                                                                 |
|      | in the Marking Scheme. If there is any variation, the same should be zero after deliberation                                                                                                                                                                                                                                                                                                                                   |
|      | and discussion. The remaining answer books meant for evaluation shall be given only after                                                                                                                                                                                                                                                                                                                                      |
|      | ensuring that there is no significant variation in the marking of individual evaluators.                                                                                                                                                                                                                                                                                                                                       |
| 6    | Evaluators will mark ( $$ ) wherever answer is correct. For wrong answer CROSS 'X" be                                                                                                                                                                                                                                                                                                                                          |
|      | marked. Evaluators will not put right ( $\checkmark$ ) while evaluating which gives an impression that                                                                                                                                                                                                                                                                                                                         |
|      | answer is correct and no marks are awarded. This is most common mistake which                                                                                                                                                                                                                                                                                                                                                  |
| 7    | evaluators are committing.<br>If a question has parts, please award marks on the right-hand side for each part. Marks                                                                                                                                                                                                                                                                                                          |
| /    | awarded for different parts of the question should then be totaled up and written in the left-                                                                                                                                                                                                                                                                                                                                 |
|      | hand margin and encircled. This may be followed strictly.                                                                                                                                                                                                                                                                                                                                                                      |
| 8    | If a question does not have any parts, marks must be awarded in the left-hand margin and                                                                                                                                                                                                                                                                                                                                       |
| -    | encircled. This may also be followed strictly.                                                                                                                                                                                                                                                                                                                                                                                 |
|      | · · · ·                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 9  | In Q1-Q20, if a candidate attempts the question more than once (without canceling the previous                                                                 |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | attempt), marks shall be awarded for the first attempt only and the other answer scored out                                                                    |
|    | with a note "Extra Question".                                                                                                                                  |
| 10 | In Q21-Q38, if a student has attempted an extra question, answer of the question deserving                                                                     |
| 11 | more marks should be retained and the other answer scored out with a note "Extra Question".                                                                    |
| 11 | No marks to be deducted for the cumulative effect of an error. It should be penalized only once.                                                               |
| 12 | A full scale of marks (example 0 to 80/70/60/50/40/30 marks as given in                                                                                        |
|    | Question Paper) has to be used. Please do not hesitate to award full marks if the answer                                                                       |
| 12 | deserves it.                                                                                                                                                   |
| 13 | Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours                                                                      |
|    | every day and evaluate 20 answer books per day in main subjects and 25 answer books per                                                                        |
|    | day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced                                                                   |
| 14 | syllabus and number of questions in question paper.                                                                                                            |
| 14 | Ensure that you do not make the following common types of errors committed by the                                                                              |
|    | Examiner in the past:-                                                                                                                                         |

|               |                                                                            |               |

|        | $90 = \frac{1}{2} \cdot 4 (BC + CA + AB)$                                                                                                                                                            |               |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
|        | 90 = 2(18 + 8 + x + 10 + x)                                                                                                                                                                          | 1             |
|        | 90 = 4(18 + x)                                                                                                                                                                                       |               |
|        | $\mathbf{x} = 4 \cdot 5$                                                                                                                                                                             |               |
|        | AB = 14.5  cm  and  AC = 12.5  cm                                                                                                                                                                    | 1             |
|        | OR                                                                                                                                                                                                   |               |
| 32(b). | Two circles with centres O and O' of radii 6 cm and 8 cm, respectively intersect at two points P and Q such that OP and O'P are tangents to the two circles. Find the length of the common chord PQ. |               |
| Sol.   | $OO' = \sqrt{6^2 + 8^2} = 10 \text{ cm}$ { $OP \perp O'P$ }<br>Let $OA = x, O'A = 10 - x$                                                                                                            | $\frac{1}{2}$ |
|        | $AP^2 = 36 - x^2$                                                                                                                                                                                    | $\frac{1}{2}$ |
|        | Also, $AP^2 = 64 - (10 - x)^2$                                                                                                                                                                       | $\frac{1}{2}$ |
| L      |                                                                                                                                                                                                      | 20            |

|      | Therefore $36 - x^2 = 64 - (10 - x)^2$                                        |   |
|------|-------------------------------------------------------------------------------|---|
|      | $1 \text{ herefore } 50 - x^2 = 04 - (10 - x)$                                |   |
|      | $\Rightarrow 36 - x^2 = 64 - 100 - x^2 + 20 x$                                |   |
|      | $\Rightarrow x = 3.6$                                                         | 2 |
|      | In $\triangle$ PAO, $AP^2 = 36 - (3 \cdot 6)^2 = 23 \cdot 04$                 |   |
|      | $\Rightarrow AP = 4.8$                                                        | 1 |
|      | $\Rightarrow$ Ar = 4.0                                                        | 1 |
|      | Length $PQ = 2 \times AP = 9.6 \text{ cm}$                                    | 2 |
| 33.  | A horse is tied to a peg at one corner of a square shaped grass field of side |   |
|      | 15 m by means of a 5 m long rope. Find the area of that part of the field     |   |
|      | in which the horse can graze. Also, find the increase in grazing area if      |   |
|      | length of rope is increased to 10 m. (Use $\pi = 3.14$ )                      |   |
|      | Area of that part of the field in which the horse can graze by means          |   |
| Sol. | of a 5 m long rope $=\frac{1}{4} \times 3.14 \times (5)^2$                    | 1 |
|      |                                                                               | 1 |
|      | $= 19.625 m^2$                                                                |   |
|      | Area of that part of the field in which the horse can graze by means          | 1 |
|      | of a 10 m long rope $=\frac{1}{4} \times 3.14 \times (10)^2$                  |   |
|      | $= 78.5 m^2$                                                                  | 1 |
|      | Increase in grazing area = 78.5 $m^2 - 19.625 m^2 = 58.875 m^2$               | 1 |

|               | $x\sqrt{3} = 10 + \frac{x}{\sqrt{3}} \Rightarrow x = 5\sqrt{3}$    |   |
|---------------|--------------------------------------------------------------------|---|
|               | $\sqrt{3}$                                                         | 1 |
|               | (a) $h = 15 m$                                                     | 1 |
|               | (b) $x = 5\sqrt{3} m$                                              | 1 |
|               | (c) $\frac{x}{PD} = \cos 60^\circ \Rightarrow PD = 10\sqrt{3} m$   | 1 |
| <b>35(a).</b> | A train travels at a certain average speed for a distance of 54 km |   |
|               | and then travels a distance of 63 km at an average speed of 6 km/h |   |
|               | more than the first speed. If it takes 3 hours to complete the     |   |
|               | journey, what was its first average speed ?                        |   |
|               |                                                                    |   |
| Sol.          | Let first average speed of the train be x km/hr.                   |   |
|               | $\frac{54}{x} + \frac{63}{x+6} = 3$                                | 2 |
|               | $\Rightarrow 54x + 324 + 63x = 3x^2 + 18x$                         |   |
|               | $\Rightarrow 3x^2 - 99x - 324 = 0 \text{ or } x^2 - 33x - 108 = 0$ | 2 |
|               | $\Rightarrow (x - 36) (x + 3) = 0$                                 |   |
|               | $\Rightarrow$ x = 36, -3 (rejected)                                | 1 |
|               | Therefore, first average speed of the train was 36 km/hr.          |   |
|               | OR                                                                 |   |
|               |                                                                    |   |

| 35(b). Two p                                 | 15 $15$ $15$                                                         |   |
|----------------------------------------------|----------------------------------------------------------------------|---|
| ~ /                                          | ipes together can fill a tank in $\frac{15}{8}$ hours. The pipe with |   |
| larger                                       | diameter takes 2 hours less than the pipe with smaller               |   |
| diamet                                       | ter to fill the tank separately. Find the time in which each         |   |
| pipe ca                                      | an fill the tank separately.                                         |   |
|                                              |                                                                      |   |
| Sol.                                         | time taken by smaller diameter tap be x hrs.                         |   |
| Time tal                                     | ken by larger diameter tap is $(x - 2)$ hrs.                         |   |
| Therefor                                     | $\operatorname{re} \frac{1}{x-2} + \frac{1}{x} = \frac{8}{15}$       | 2 |
| $\Rightarrow$ 15(2x                          | (x-2) = 8x(x-2)                                                      |   |
| $\Rightarrow 8x^2 -$                         | 46x + 30 = 0                                                         |   |
| $\Rightarrow$ 4x <sup>2</sup> –              | 23x + 15 = 0                                                         | 1 |
| $\Rightarrow$ (4x –                          | 3)(x-5) = 0                                                          |   |
| $\Rightarrow$ x = $\frac{3}{4}$ ,            | x = 5                                                                | 1 |

| 36.  | A middle school decided to run the following spinner game as a fund-raiser on Christmas Carnival.                                                                                                                           |   |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
|      | (R) (G) (G) (R) (R) (B) (B) (B) (B) (B) (B) (B) (B) (B) (B                                                                                                                                                                  |   |
|      | outcome is written as 'RB'.                                                                                                                                                                                                 |   |
|      | Based on the above, answer the following questions :                                                                                                                                                                        |   |
|      | (i) List all possible outcomes of the game.                                                                                                                                                                                 |   |
|      | (ii) Find the probability of 'Making Purple'.                                                                                                                                                                               |   |
|      | <ul> <li>(iii) (a) For each win, a participant gets ₹ 10, but if he/she loses, he/she has to pay ₹ 5 to the school.</li> <li>If 99 participants played, calculate how much fund could the school have collected.</li> </ul> |   |
|      | OR                                                                                                                                                                                                                          |   |
|      | <ul> <li>(iii) (b) If the same amount of ₹ 5 has been decided for winning or losing the game, then how much fund had been collected by school? (Number of participants = 99)</li> </ul>                                     |   |
| Sol. | <ul> <li>(i) All possible outcomes: RR, RG, RB, GR, GB, GG, YR, YB, YG</li> <li>(ii) Number of favourable outcome (RB) = 1</li> </ul>                                                                                       | 1 |
|      | (ii) rumber of favourable outcome (KD) – 1                                                                                                                                                                                  |   |

| $P(Making purple) = \frac{1}{9}$                                | 1             |
|-----------------------------------------------------------------|---------------|
| (iii)(a) As P(winning) = $\frac{1}{9}$                          |               |
| therefore number of people must win = $\frac{1}{9} \ge 99 = 11$ | $\frac{1}{2}$ |
| ∴ Game lost by 88 persons.                                      | $\frac{1}{2}$ |
| Funds collected = 5 x 88 – 10 x 11 = ₹ 330                      | 1             |
| OR                                                              |               |
| (iii)(b) Number of participants = 99                            |               |
| P(winning the game) = $\frac{1}{9}$                             |               |
| Number of persons won = 11                                      | $\frac{1}{2}$ |
| Number of persons lost = 88                                     | $\frac{1}{2}$ |
| Funds collected = 88 x 5 – 11 x 5 = ₹ 385                       | 1             |

| 37.  | A golf ball is spherical with about 300 – 500 dimples that help increase<br>its velocity while in play. Golf balls are traditionally white but available<br>in colours also. In the given figure, a golf ball has diameter<br>4.2 cm and the surface has 315 dimples (hemi-spherical) of radius 2 mm. |   |
