READING

I. Read the passage given below.

- I. Man does not Live by food alone. Water is vital to human health and fitness. Although it is not a nutrient per se as are carbohydrates, fats, proteins, vitamins and minerals. It, in fact, is a key nutrient as no life is possible without it. Whereas we can do for weeks without food, we cannot live without water longer than a couple of days.
- II. Water approximates 60 per cent of the body weight of human adults. The total amount of water in a man weighing 70 kilograms is approximately a little over 40 litres. It is an excellent solvent - more substances are soluble in water than in any other liquid known so far. This makes it an ideal constituent of the body fluids which sustain life supporting chemical reactions. It dissolves varied products of digestion and transports them to the rest of the body. Likewise, it dissolves diverse metabolic wastes and helps drain them out of the body. Besides, it performs a variety of functions—some well known and well understood while others not so well appreciated yet vita l. The no less important role of water is to distribute/dissipate the body heat efficiently, thereby regulating body's temperature. Water accomplishes this role ideally because it has high thermal conductivity ensuring rapid heat transfer from one part to the other.
- III. Above all, water has a high-specific heat, implying that it takes a lot of heat to raise the temperature of water and likewise much heat must be lost to lower its temperature.
- IV. Drinking a lot of water is an inexpensive way to stay healthy. Even excess of water is harmless. Water therapy- drinking a litre or so the first thing in the morning is kidney-friendly.
- V. The water regulation in the body is affected by hypothalamus in two ways i.e., (i) by creating the sensation of thirst which makes us drink water and (ii) by controlling the excretion of water as urine. If water regulation fails, medical emergency ensues.

II. Read the passage given below.

I. In the year ended December 2016, 3.5 million overseas visitors arrived in New Zealand. But how many visitors are in New Zealand on any given day of the year? The question has practical importance. Visitors to New Zealand create demand for goods and services, including transportation, accommodation, and tourist activities. They also have an impact on local infrastructure. Knowing how many visitors are in New Zealand on any given day might be important for civil defence or flu pandemic planning.

II. The following data explores the seasonal fluctuations of visitors to New Zealand and New Zealand residents travelling overseas. This is based on short-term trips - those travelling for less than 12 months:

- In 2016, the number of overseas visitors in New Zealand ranged from 112,000 on 31 August to 354,000 on 29 December.
- In contrast, in 2016 the number of New Zealand residents temporarily overseas ranged from 72,000 on 1 March to 235,000 on 29 December.
- In both cases, the late December peak reflects an upsurge in travellers visiting friends and family, as well as an upsurge in those visiting for holidays.

III. There are strong seasonal patterns in visitor numbers (see figure below). In recent years the number of visitors in New Zealand peaked in the week of 27 December to 2 January. The peak day was 29 December in 2011-13 and 2016, and 28 December in 2014 and 2015.

IV. At that peak in 2016, the number of overseas visitors in New Zealand was 354,000. This compares with a peak of 191,000 in 2000. Since 2000, the number of visitors in New Zealand has increased across every day of the year, but more during the summer months (December to March).

V. The number of visitors in New Zealand tends to be at its lowest in late August, early September, and mid-June. On 31 August 2016, there were an estimated 112,000 overseas visitors in New Zealand. This is 242,000 less than the peak reached on 29 December.
