

Definitions

- (i) Range = U. L - L. L
- (ii) $CI \% = \frac{\text{Range}}{\text{No. of classes}}$
- (iii) Discrete : Fixed magnitude
eg :- 10, 20, 25
- (iv) Continuous = Magnitude not fixed
eg :- 10 - 20, 20 - 30

Collection of Data

- (i) Primary Data :

Measure of Centre Tendency

(i) Mean $\% = \frac{\text{Sum of observation}}{\text{No. of observation}}$

(ii) Median = middle observation

n = odd n = even

$$\text{Median} \% = \frac{n+1}{2}^{\text{th}} \text{ observation} \quad \text{or} \quad \frac{n}{2}^{\text{th}} \text{ and } \frac{n+1}{2}^{\text{th}} \text{ observation}$$

(iii) Mode = observation with max. freq.

Empirical Relation b/w mode, median, mean
Mode = 3 median - 2 mean
