

# Prepositions

---

## Introduction to Prepositions

Prepositions are words that join a noun, a pronoun or a group of words acting as a noun with another part of a sentence. **A preposition should always have at least one object** (noun, pronoun or a group of words acting as a noun). This is the object that it joins with the rest of the sentence.

For example:

Reema's house is located **near** the temple.

(Here, 'near' is a preposition that connects the noun 'the temple' with the rest of the sentence. 'The temple' is the object of the preposition, i.e., the prepositional object.)

**[Remember:** *A preposition will always have an object.*]

## Purpose of Prepositions

### *What does a preposition do?*

A preposition **shows the relation between its object and the part of a sentence with which it joins the object**. Consider the following examples to understand the different relations shown by a preposition.

Nalini will return **on** Monday.

Here, 'on' is the preposition that connects 'Monday' with the rest of the sentence. '**Monday**' is the **prepositional object**.

Without the preposition, the sentence would look as follows:

Nalini will return \_\_\_\_\_ Monday.

Very clearly, 'Monday' has to be linked in some manner with 'Nalini will return'. When 'on' is added to the empty space, one gets to know **WHEN Nalini will return**. She will return **ON Monday**. Hence, in this sentence, the preposition indicates **TIME**.

Kapil is waiting **in** the park.

Here, 'in' is the preposition that connects 'the park' with the rest of the sentence. '**The park**' is the **prepositional object**.

Without the preposition, the sentence would look as follows:

Kapil is waiting \_\_\_\_\_ the park.

Very clearly, 'the park' has to be linked in some manner with 'Kapil is waiting'. When 'in' is added in the empty space, one gets to know **WHERE Kapil is waiting**. He is waiting **IN the park**. Hence, in this sentence, the preposition indicates **PLACE**.

Unni is going **toward** Raju's house.

Here, 'toward' is the preposition that connects 'Raju's house' with the rest of the sentence. '**Raju's house**' is the **prepositional object**.

Without the preposition, the sentence would look as follows:

Unni is going \_\_\_\_\_ Raju's house.

Very clearly, 'Raju's house' has to be linked in some manner with 'Unni is going'. When 'toward' is added to the empty space, one gets to know **WHERE Unni is going**. He is going **TOWARD Raju's house**. Hence, in this sentence, the preposition indicates **MOVEMENT**.

One should not learn things **by** rote.

Here, 'by' is the preposition that connects 'rote' with the rest of the sentence. '**Rote**' is the **prepositional object**.

Without the preposition, the sentence would look as follows:

One should not learn things \_\_\_\_ rote.

Very clearly, 'rote' has to be linked in some manner with 'one should not learn things'. When 'by' is added to the empty space, one gets to know **HOW not to learn things**. Things should not be learnt **BY rote**. Hence, in this sentence, the preposition indicates **MANNER**.

Yudhishtir went to Darjeeling **for** a vacation.

Here, 'for' is the preposition that connects 'a vacation' with the rest of the sentence. '**A vacation**' is the **prepositional object**.

Without the preposition, the sentence would look as follows:

Yudhishtir went to Darjeeling \_\_\_\_ a vacation.

Very clearly, 'a vacation' has to be linked in some manner with 'Yudhishtir went to Darjeeling'. When 'for' is added to the empty space, one gets to know **WHY Yudhishtir went to Darjeeling**. He went there **FOR a vacation**. Hence, in this sentence, the preposition indicates **PURPOSE**.

A leg **of** the round table is broken.

Here, 'of' is the preposition that connects 'a leg' with 'the round table'. '**The round table**' is the **prepositional object**.

Without the preposition, the sentence would look as follows:

A leg \_\_\_\_ the round table is broken.

Very clearly, 'a leg' has to be linked in some manner with 'the round table'. When 'of' is added to the empty space, it becomes clear that **one of the legs OF 'the round table'** is broken. Hence, in this sentence, the preposition indicates **POSSESSION**.

Gagan Joseph's new song is just **like** the one Tony Martini had composed for the movie 'A September Evening'.

Here, 'like' is the preposition that connects 'Gagan Joseph's new song' with 'the one Tony Martini had composed'. **'The one' is the prepositional object.**

Without the preposition, the sentence would look as follows:

Gagan Joseph's new song is just \_\_\_\_ the one Tony Martini had composed for the movie 'A September Evening'.

Very clearly, 'Gagan Joseph's new song' has to be linked in some manner with 'the one Tony Martini had composed'. When 'like' is added to the empty space, it becomes clear that **the new song composed by Gagan Joseph is very much LIKE the one composed by Tony Martini** for the movie 'A September Evening'. Hence, in this sentence, the preposition indicates **SIMILARITY/COMPARISON**.

The toy was given to the little boy **by** his parents.

Here, 'by' is the preposition that connects 'the toy given to the little boy' with 'his parents'. **'His parents' is the prepositional object.**

Without the preposition, the sentence would look as follows:

The toy was given to the little boy \_\_\_\_ his parents.

Very clearly, 'the toy given to the little boy' has to be linked in some manner with 'his parents'. When 'by' is added to the empty space, it becomes clear as to **WHO gave the toy to the little boy**. It was **given to him BY his parents**. Hence, in this sentence, the preposition indicates **SOURCE/AGENCY**.

## The Preposition AT

### *AT Indicating PRICE*

The apples are being sold **at** twenty rupees per kilogram.
