h. They help to solve problems such as the income inequalities, development of backward areas and developing a linkage between the rural areas and urban market.

i. It generates more number of employment opportunities per unit of capital invested.

Q. 3 Discuss the problems faced by small scale industries.

Answer:

The problems faced by small scale industries are mentioned below:

a. The main problem faced by the small scale industries is the lack of Finance. Finance is required to establish business and carry out their day to day operations. They do not have the creditworthiness and the Collateral to raise the capital from the Financial Institutions. Banks are also hesitant to lend them loans. Eventually, they have to rely on the money lenders who charge exorbitant rates of interest and exploit them. They also fall short of the working capital because of the delayed payment.

b. A small business is established by a manager who does not have the required managerial skills to run the business. Some of the managers have good technical knowledge but are not successful in marketing their product. Some of them may have good advertising techniques but may not have adequate technical knowledge. Due to the shortage of funds, they cannot employ a professional manager.

c. They do not have easy access to raw material. They have to make a compromise either on the quality of the raw material for high price for its procurement. They usually purchase small quantities of raw material because of the lack of storage capacity and low bargaining power.

- d. Due to the shortage of funds these industries are not able to employ workers at a high salary. This affects the willingness to work of the employee. This leads to lower productivity per employee and higher employee turnover. Division of labour can also not be practiced in this Industries.
- e. These industries are not able to market their products in the right direction. They do not have the required infrastructure which is required for efficient marketing. They have to depend excessively on the middlemen which exploit by taking a very low price for the good.
- f. Due to the various internal and external problems faced by these industries, most of these units are considered to be sick units. Internal problems include a lack of skilled labour and adequate marketing skills. External problems include delay payments and inadequate loans.
- g. The technology used by these Industries is obsolete. They are unable to afford more advanced technology.
- h. They always operate below their full capacity due to the law of demand. This leads to an increase in their operating cost which eventually leads to its sickness and closure.
- i. They are not able to withstand the competition in the global market with the larger MNCs.

Q. 4 What measures has the government taken to solve the problem of finance and marketing in the small scale sector?

Answer:

The government has taken to solve the problem of finance and marketing in the small scale sector are:

- a. National bank for Agriculture and Rural Development NABARAD- It was established in 1982. Its main objective was to promote integrated rural development. It is an Apex body that governs the operations of the rural and Gramin banks. It supports small industries, cottage and village

industries, and rural artist. It provides easy and cheap credit facilities to these Industries. It provides regular training and development program for rural entrepreneurs.

b. World Association for Small and Medium Enterprise WASME -It is an international non-government organization. It was set up to address the problems faced by small industries. It has also set up an International Committee for Rural Industrialization to help these Industries grow and develop.

c. Small Industries Development Bank of India-It was set up as an Apex Bank to provide financial assistance through direct and indirect ways under different schemes to the small industries.

d. The National Commission for Enterprises in the Unorganized Sector- NCEUS - it was established in 2004. First to improve efficiency and enhance the global competitiveness of these industries. Undeveloped linkages with other institutions with regard to raw material, marketing, technology, and Finance.

e. Rural small business development center- It is sponsored by NABARD. It focuses on economically disadvantaged groups. It provides technical support to the current and prospective entrepreneurs in rural areas.

f. National Small Industries Corporation- it was set up in 1955 to promote the growth of small business units in India. It provides raw material at a lower rate, provides machinery on easy hire purchase terms, provides Technology upgradation, software parks development and export the products produced by these units.

g. Rural and women entrepreneurship development - It provides a conducive and healthy environment for the growth of the women entrepreneurs. It provides them with regular training and development programs.

h. District industry Center-It was established in 1978 at a district level for the promotion of small scale industries.

Q. 5 What are the incentives provided by the Government for industries in backward and hilly areas?

Answer:

The incentives provided by the Government for industries in backward and hilly areas are:

- The government provides land for the setting up of industries. Some of the states might offer an exemption of rent in the initial years or payment in the form of installment. Some of the states even offer lands at a concessional rate. The terms and conditions vary from state to state.
- Power is supplied at a concessional rate of 50% then the original price. Some of the states even give exemption of the payment of the power received.
- Industries are exempted from sales tax in all the union territories. Some of the states have exempted them for 5 years.
- Water is supplied at a no-profit no-loss basis or at a 50% concession or with a complete exemption for the initial years.
- The industries established in the backward areas for hilly areas receive the preferential treatment in the allotment of scarce raw materials such as iron and cement.
- Octroi has been abolished in almost all the states. Loans are offered at a lower rate.
- Finance subsidy is given for building capital Assets of 10% to 15%.
- one of these States encourage the setting up of industries in the backward areas. These Industries received a tax holiday of 5 to 10 years.
