#### **ANSWER:**

The following are the different ways in which a partner can retire from a firm.

- i. With the consent of all other partners: A partner must take the consent of all the co-partners of the firm before his/her retirement. Thereafter, the partner can retire from the firm if and only if all the partners agree on the decision of his/her retirement.
- ii) With an express agreement by all the partners: In case of written agreement among the partners a partner may retire from the firm by expressing his/her intention of leaving the firm though a notice to the other partners of the firm.
- iii) By giving a written notice: If partnership among the partners is at will then a partner may retire by giving notice in writing to all the other partners informing them about his/her intention to retire.

#### Page No 213:

**Question 2:** Write the various matters that need adjustments at the time of retirement of partner/partners.

#### **ANSWER:**

The following are the various matters that need to be adjusted at the time of retirement of partners/partner.

- 1. Calculation of new gaining ratio of all the remaining partners of the firm.
- 2. Calculation of new ratio of the remaining partners of the firm.
- 3. Calculation of goodwill of the new firm and its accounting treatment.

#### Page No 213:

Question 3: Distinguish between sacrificing ratio and gaining ratio.

#### **ANSWER:**

Basis of Difference	Sacrificing ratio	Gaining Ratio
1. Meaning	It is the ratio in which old partners agree to sacrifice their share of profit in favour of new partners/partner	It is the ratio in which continuing partner acquires the share of profit from outgoing partner/partner
2. Calculation	Sacrificing Ratio = Old Ratio – New Ratio	Gaining Ratio = New Ratio – Old Ratio
3. Time	It is calculated at the time of admission of new partners/partner.	It is calculated at the time of retirement/death of old partners/partner.

4. Objective	It is calculated to ascertain the share of profit and loss given up by the existing partners in favour of new partners/partner.	It is calculated to ascertain the share of profit and loss acquired by the remaining partners (of the new firm in case of retirement) from the retiring or deceased partner.
5. Effect	It reduces the profit share of the existing partners.	It increases the profit share of the remaining partners.

#### **Page No 214:**

**Question 4:** Why do firm revaluate assets and reassess their liabilities on retirement or on the event of death of a partner?

#### **ANSWER:**

At the time of retirement or death of a partner, it becomes inevitable to revalue the assets and liabilities of the firm for ascertaining their true and fair values. The revaluation is necessary as the value of assets and liabilities may increase or decrease with the passage of time. Further, it may be possible that there are certain assets and liabilities that remained unrecorded in the books of accounts. The retiring or the deceased partner may be benefited or may bear loss due to change in the values of assets and liabilities. Therefore, the revaluation of the assets and liabilities is necessary in order to ascertain the true profit or loss that is to be divided among all the partners in their old profit sharing ratio.

#### Page No 214:

**Question 5:** Why a retiring/deceased partner is entitled to a share of goodwill of the firm?

**ANSWER:** 

Goodwill is an intangible asset of a firm that is earned by the efforts of all the partners of the firm. After the retirement or death of a partner, the fruits of the past performance and reputation will be shared only by the remaining partners. Thus the remaining partners should compensate the retiring or the deceased partner by entitling him/her a share of firm's goodwill.

**Question 3:** Explain the treatment of goodwill at the time of retirement or on the event of death of a partner?

#### **ANSWER:**

At the time of retirement or at the event of death of a partner, the goodwill is adjusted among the partners in gaining ratio with the share of goodwill of the retiring or the deceased partner. As per Para 16 of Accounting Standard 10, it is mandatory to record goodwill in the books only when consideration in money or money's worth has been paid for it.

In case of retirement and death of a partner, goodwill account cannot be raised. There are namely two probable situations on which the treatment of goodwill rests.

- 1. If *goodwill already appears* in the books of the firm.
- 2. If *no goodwill appears* in the books of the firm.

# Situation 1: If goodwill <u>already appears</u> in the books of the firm.

## Step 1: Write off the existing goodwill

If goodwill already appears in the old balance sheet of the firm (if mentioned in the question), then first of all, this goodwill should be written off and should be distributed among all the partners of the firm including the retiring or the deceased partner in their old profit sharing ratio. The following Journal entry is passed to write off the old/existing goodwill.

All Partners' Capital A/c

Dr.

To Goodwill A/c

(Goodwill written of among all the partners in their old ratio)

#### Step 2: Adjusting goodwill through partner's capital account.

After writing off the old goodwill, the goodwill need to be adjusted through the partner's capital account with the share of the goodwill of the retiring or the deceased partner. The following Journal entry is passed.

Remaining Partner's Capital A/c

Dr.

To Retiring/Deceased Partner's Capital A/c

(Gaining Partner's Capital A/c is debited in their gaining share and retiring/deceased partner's capital account in credited for their share of goodwill)

#### Situation 2: If <u>no goodwill appears</u> in the books of the firm.

As no goodwill appears in the books of the firm, so the goodwill is adjusted through the partner's capital account with the share of the goodwill of the retiring or the deceased partner. The following Journal entry is passed.

Remaining Partner's Capital A/c

Dr.

To Retiring/Deceased Partner's Capital A/c

(Gaining partner's capital account is debited in their gaining share and retiring/deceased partner's capital account in credited for their share of goodwill)

#### Page No 214:

**Question 4:** Discuss the various methods of computing the share in profits in the event of death of a partner.

#### ANSWER:

In case of death of a partner during the year, his/her executer is entitled for share of profit up to the date of death of the partner.

The share of profit can be calculated by one of the two methods.

1) **On time basis:** Under this method, profit up to the date of the death of the partner is calculated on the basis of the last year's/years' profit or average profit of last few years. In this approach, it is assumed that the profit will be uniform throughout the current year. The deceased partner will be entitled for the share of the profit proportionately up to the date of his/her death.

#### **Share of Deceased Partner in Profit =**

Previous Year/Average Profit 
$$\times \frac{\text{Time period from date of balance sheet till death}}{12 \text{ month } /52 \text{ weeks } /365 \text{ days}}$$

× Profit Share of deceased partner

**Example-** A, B and C are equal partners. The profit of the firm for the years 2008, 2009 and 2010 are Rs 10,00,000, Rs 7,00,000 and Rs 13,00,000 respectively. C dies on April 30, 2011. The share of C in the firm's profit will be calculated on the basis of average profit of last three years. Firm closes its books every year on December 31.

In this case, C's share in the profits will be calculated for four months, i.e. from January 01, 2011 to April 30, 2011.

Average Profit = 
$$\frac{10,00,000+7,00,000+13,00,000}{3}$$
 = Rs. 10,00,000

C's share of Profit = 
$$10,00,000 \times \frac{4}{12} \times \frac{1}{3} = \text{Rs. } 1,11,111 \text{ approx.}$$

2) **On the sale basis:** Under this method, profit is calculated on the basis of last year's sale. In this situation, it is assumed that the net profit margin of the current year's sale is similar to that of the last year's.

Share of Deceased Partner's Profit =  $\frac{\text{Previous Year's Profit}}{\text{Previous Year's Sales}} \times \text{Sales from the}$  beginning of the current year up to the date of death  $\times$  Share of deceased partner

**Example-** X Y and Z are equal partners. The last year's sales and profit were Rs 25,00,000 and Rs 2,50,000. Z died on the April 30, 2011. Sales of the current year till the date of Z's death amounts to Rs 12,00,000. Firm closes its books on December 31 every year.

Z's share of profit = 
$$\frac{2,50,000}{25,00,000} \times 12,00,000 \times \frac{1}{3} = \text{Rs. } 40,000$$

**Question 1:** Aparna, Manisha and Sonia are partners sharing profits in the ratio of 3:2:1. Manisha retires and goodwill of the firm is valued at Rs 1,80,000. Aparna and Sonia decided to share future in the ratio of 3:2. Pass necessary Journal entries.

ANSWER:

#### Books of Aparna, and Sonia

#### Journal

Date	Particulars		L. F.	Amount Rs	Amount Rs
	Aparna's Capitals A/c	Dr.		18,000	
	Sonia's Capital A/c	Dr.		42,000	
	To Manisha's Capital A/c				60,000
	(Manisha's share of goodwill Aparna's and Sonia's Capital Acceptaining ratio)	· ·			

## **Working Notes:**

1. Manisha's share in goodwill:

Total goodwill of the firm × Retiring Partner's Share

$$= 1,80,000 \times \frac{1}{3} = 60,000$$

2. Gaining Ratio = New Ratio - Old Ratio

Aparna Gaining share 
$$=\frac{3}{5} - \frac{3}{6} = \frac{18-15}{30} = \frac{3}{30}$$

Sonia Gaining share 
$$=\frac{2}{5} - \frac{1}{6} = \frac{12-5}{30} = \frac{7}{30}$$

Gaining Ratio between Aparna and Sonia = 3:7

3. Aparna's share in goodwill =  $60,000 \times \frac{3}{10} = 18,000$ 

Sonia's share in goodwill = 
$$60,000 \times \frac{7}{10} = 42,000$$

**Question 2:** Sangeeta, Saroj and Shanti are partners sharing profits in the ratio of 2:3:5. Goodwill is appearing in the books at a value of Rs 60,000. Sangeeta retires and goodwill is valued at Rs 90,000. Saroj and Shanti decided to share future profits equally. Record necessary Journal entries.

#### **ANSWER:**

# Books of Saroj and Shanti Journal

	To Sangeeta's Capital A/c				18,000
	(Sangeeta's share of goodwill adjusted to Saroj's Capital Account in her gaining ratio)	ı			

## **Working Notes:**

1. Sangeeta's share of goodwill.

Total goodwill of the firm 'Retiring Partner's share =  $90,000 \times \frac{2}{10} = 18,000$ 

2. Gaining Ratio = New Ratio – Old Ratio

Saroj's Gaining Share 
$$=\frac{1}{2} - \frac{3}{10} = \frac{10-6}{20} = \frac{4}{20}$$
  
Shanti's Gaining Share  $=\frac{1}{2} - \frac{5}{10} = \frac{10-10}{20} = \frac{0}{20}$

2. Gaining Ratio = New Ratio – Old Ratio

Digvijay's Share 
$$=\frac{2}{3} - \frac{2}{5} = \frac{10-6}{15} = \frac{4}{15}$$

Parakaram's Share = 
$$\frac{1}{3} - \frac{1}{5} = \frac{5-3}{15} = \frac{2}{15}$$

Gaining ratio between Digvijay and Parakaram = 4:2 or 2:1

## **Working Notes:**

1) Pammy's Share of Profit

Previous Year's Profit × Proportionate Period × Share of Deceased Partner =  $30,000 \times \frac{6}{12} \times \frac{1}{5} = \text{Rs. } 3,000$ 

2) Pammy's Share of Goodwill

Goodwill of the firm = Average Profit × Numbers of Year's Purchase

Average Profit = 
$$\frac{80,000+50,000+40,000+30,000}{4} = \frac{2,00,000}{4} = \text{Rs. } 50,000$$

Goodwill of the firm =  $50,000 \times 3 = \text{Rs } 1,50,000$ 

Pammy's Share = 
$$1,50,000 \times \frac{1}{5}$$
 = Rs. 30,000

3) Gaining Ratio = New Ratio – Old Ratio

Puneet's Share 
$$=\frac{2}{4} - \frac{2}{5} = \frac{10-8}{20} = \frac{2}{20}$$

Pankaj's Share 
$$=\frac{2}{4} - \frac{2}{5} = \frac{10-8}{20} = \frac{2}{20}$$

Gaining Ratio between Puneet and Pankaj = 2: 2 or 1: 1

4) Interest on Capital for 6 months, i.e. from April 1, 2007 to September 30, 2007

Amount of Capital × Rate of Interest × Period =  $40,000 \times \frac{12}{100} \times \frac{6}{12} = Rs$ . 2,400

#### 5) Interest Amount

The firm closes its books every year on March 31, while installments to Pammy's Executor are paid on September 30 every year.

Amount outstanding on 30 September = 75,400 - 15,400 = Rs 60,000

#### **Calculation of Interest**

Periods	Amount Outstanding	Yearly Interest	For 6 Months
2017-18	60,000	$60,000 \times \frac{12}{100} = 7,200$	$7,200 \times \frac{6}{12} = 3,600$
2018-19	45,000	$45,000 \times \frac{12}{100} = 5,400$	$5,400 \times \frac{6}{12} = 2,700$
2019-20	30,000	$30,000 \times \frac{12}{100} = 3,600$	$3,600 \times \frac{6}{12} = 1,800$
2020-21	15,000	$15,000 \times \frac{12}{100} = 1,800$	$1,800 \times \frac{6}{12} = 900$

$$\times \frac{3}{12} \times \frac{2}{7}$$
 = Rs. 1,000

2. Rockey's Share of Goodwill

Goodwill of a firm = Average profit × Numbers of year's Purchase

Average Profit = 
$$\frac{12,000+16,000+14,000}{3} = \frac{42,000}{3} = \text{Rs. } 14,000$$

Goodwill of a firm =  $14,000 \times 2 = \text{Rs } 28,000$ 

3. Gaining Ratio = New Ratio - Old Ratio

Prateek's Share = 
$$\frac{3}{5} - \frac{3}{7} = \frac{21 - 15}{35} = \frac{9}{35}$$

Kushal's Share 
$$=\frac{2}{5} - \frac{2}{7} = \frac{14-10}{17} = \frac{4}{25}$$

- 2. Gaining Ratio = New Ratio Old Ratio

Narang's Gaining Share =

Suri's Gaining Share 
$$=\frac{1}{4} - \frac{1}{6} = \frac{3-2}{12} = \frac{1}{12}$$

Gaining Ratio between Narang and Suri = 3:1

3. Calculation of New Capitals of the existing partners.

Balance in Narang's Capital = 34,230

Balance in Suri's Capital = 31,410

Total Capital of the New firm after = Rs 65,640

revaluation of assets and liabilities and adjustment of Goodwill and Reserves Based on new profit sharing ratio of 3:1

Narang's Capital = 
$$65,640 \times \frac{3}{4}$$
 = Rs. 49,230

Suri's Capital =

 = Rs. 16,410

#### NOTE:

- i. In the given Question Suri's Capital is Rs 30,000 instead of Rs 20,000.

## **Working Notes:**

- 1) Pramod's share of goodwill = Total goodwill of the firm × Retiring Partner's Share =  $10,000 \times \frac{3}{10}$  = Rs. 3,000
- 2) Gaining Ratio = New Ratio Old Ratio

Rajesh's Gaining Share 
$$=\frac{3}{5} - \frac{4}{10} = \frac{6-4}{10} = \frac{2}{10}$$

Nishant Gaining Share 
$$=\frac{2}{5} - \frac{3}{10} = \frac{4-3}{10} = \frac{1}{10}$$

Gaining Ratio between Rajesh and Nishant = 2:1

**NOTE:** In the above solution, in order to adjust the capital of remaining partners in the new firm according to their new profit sharing ratio, the

surplus or the deficit of Capital Account is transferred to their Current Account. But, in order to match the answer with that of given in the book, the surplus or the deficit amount of the Partners' Capital Account, will either be withdrawn or brought in by the old partners. This treatment will be shown in the Partners' Capital itself and no need to transfer the surplus or deficit capital balance to their Current Accounts. The following Journal entry is passed to record the withdrawal of surplus capital by the partners.

## **Working Notes:**

1. Bharti's share of profit = Profit is 10% of sales

Sales during the last year for that period were Rs 1,00,000

If sales are Rs 1,00,000, then the profit is Rs 10,000

Bharti's share = 
$$10,000 \times \frac{2}{6}$$
 = Rs. 3,333

2. Bharti's Share of Goodwill

Goodwill of the firm = Average Profit × Number of Years Purchase

Average Profit = 
$$\frac{8,200+9,000+9,800}{3}$$
 = Rs. 9,000

Or, 
$$9,000 - 20\%$$
 of  $9,000 = 9,000 - 1,800 = \text{Rs } 7,200$ 

Goodwill of the firm = 
$$7,200 \times 2 = \text{Rs } 14,400$$

Bharti's share = 
$$14,400 \times \frac{2}{6}$$
 = Rs. 4,800

3. Gaining Ratio = New Ratio - Old Ratio

Arti's Gaining Share = 
$$\frac{3}{4} - \frac{3}{6} = \frac{9-6}{12} = \frac{3}{12}$$

Seema's Gaining Share 
$$=\frac{1}{4} - \frac{1}{6} = \frac{3-2}{12} = \frac{1}{12}$$

Gaining ratio between Arti and Seema = 3:1

4. Interest on Capital for 73 days, i.e. from April 1, 2016 to June 12, 2016

Interest on capital = Amount of Capital × Ratio of Interest × Period =  $12,000 \times \frac{10}{100} \times \frac{73}{365} = \text{Rs. } 240$

Previous year's profit × Proportionate Period × Share of Profit =  $15,000 \times \frac{4}{12} \times \frac{2}{10} = \text{Rs. } 1,000$ 

# 3. Mithya's share of Goodwill

Goodwill of a firm = Average Profit × Number of Year's Purchase

Average Profit = 
$$\frac{13,000+12,000+16,000+15,000}{4}$$
 = Rs. 14,000

Goodwill of the firm =  $14,000 \times 2\frac{1}{2} = \text{Rs. } 14,000$ 

Mithya's share of goodwill = 35,000  $\times \frac{2}{10}$  = Rs. 7,000

4. Gaining Ratio = New Ratio – Old Ratio

Nithya's Gaining share 
$$=\frac{5}{8} - \frac{5}{10} = \frac{25-20}{40} = \frac{5}{20}$$

Sathya's Gaining share 
$$=\frac{3}{8} - \frac{3}{10} = \frac{15-12}{40} = \frac{3}{40}$$

Gaining Ratio between Nithya and Sathya = 5:3
