

# Practical Organic Chemistry

## Question1

**In the preparation of sodium fusion extract, the purpose of fusing organic compound with a piece of sodium metal is to**

**KCET 2025**

**Options:**

- A. Convert the organic compound into vapour state
- B. Convert the elements of the compound from covalent form to ionic form
- C. Convert the elements of the compound from ionic form to covalent form
- D. Decrease the melting point of the compound

**Answer: B**

**Solution:**

The purpose of sodium fusion extract is to convert the element in the organic compound into ionic compound so that the detection could become easier.
